It's no puzzle why MGs are so popular...

A truly affordable British classic with
a rich history and extensive back-up
(very much like Peter James Insurance).

There's an MG for everyone. From the
stylish saloons of the 1940s and 50s,
the hip young convertibles of the 60s,
70s and 80s to the remarkable modern
classic - The MG Maestro!

Now that one is a puzzle but...

If it's important to you...
it's important to us.

MG Octagon Car Club Parts List

This is our first attempt at producing a 'Parts List' for over 20 years. We fully understand that our on-line Parts List on our web-site is not the easiest to navigate, so we have tried to make it better for our members with this booklet. Because of the number of MG models that we cater for, it is not possible for a small club like ours to produce an illustrated catalog. There are NO prices in this Parts List as the prices change every time we buy in new stock. This Parts List will make it easier to find the parts you need, once you have the part number you can find the latest price from the on-line parts price list on our website.

What we have done is provide you with a list that is divided up into hopefully meaningful chapters. We start off with chapters on the two main engines fitted to the majority of our members cars, the XPAG Engine (including XPEG) fitted to the TB, TC, TD, TF, YA, YB and YT and the MPJG engine fitted to the TA. Then follows a number of chapters that are specific to all models, covering Carburettor/Fuel, Clutch/Gearbox, Electrical, Hoses and Windscreen.

Following this are some meaty chapters that cover items common to a specific group of models such as TA/TB/TC, followed by TD/TF, then the Y type's YA/YB/YT. From there we have a chapter on MMM models (D, F, J, K, L, N and P) and finally the SVW models (SA, VA and WA). The very last chapter covers miscellaneous items that are not model specific and could be applicable to all cars.

If you cannot find listed what you are looking for don't give up, give Pete a call in the office on 01455 611746. It may be that we have only just put it into stock after the Parts List was published, or maybe we don't stock it at all. However in this case ask Pete if he can get it for you, he is really good at sourcing difficult to find spares.
